## Summary

I am an aspiring full-stack developer with a passion for creating dynamic web applications. Proficient in technologies like Node.js, Express, React, and MySQL, I am eager to kick-start my career in full-stack development.

- Solid foundational knowledge in full-stack development.
- Quick learner, adaptable to new technologies and methodologies.
- Strong problem-solving skills and a detail-oriented approach.
- Committed to delivering user-centric and efficient solutions.
- Enthusiastic team player with a desire to contribute to collaborative projects.

I am excited to apply my skills and grow as a developer in a dynamic and supportive environment.

## Education

### John Bryce

Full Stack and Web Application Development,

2021 - 2022

Overview: Developed a comprehensive web application called "Vacation Feed" that serves as an online platform for users to explore vacation destinations, view pricing information, and access statistical insights about various vacations. The project also includes a user-friendly admin panel with functionalities for adding, editing, and deleting vacation listings.

My Role: As the sole developer, I assumed full responsibility for the project, including concept development, design, and implementation.

Achievements:

- Created a dynamic website that provides users with up-to-date information on vacation destinations and pricing.
- Implemented a robust admin panel with CRUD (Create, Read, Update, Delete) operations for managing vacation listings.
- Utilized Node.js with Express for the server-side development, ensuring efficient data retrieval and processing.
- Designed a MySQL database to store vacation data and facilitate seamless information retrieval.
- Developed the client-side interface using React and Material-UI (MUI) to enhance user experience and accessibility.
- Conducted testing using Chai and Mocha to ensure the reliability of API endpoints and overall system functionality.

Skills Used: Node.js, Express, MySQL, React, Material-UI (MUI), Chai, Mocha
